

LSD LADDER STAGING BRACKETS ASSEMBLY INSTRUCTIONS

PARTS LIST

- Two Mounting brackets with adjustable struts, staging board locking bolts and corner post locking thumbscrews.
- Two Outer corner posts with U bolts for handrail and midrail and L bolts to retain the toeboard both along the length of the board and across the ends.
- Two Inner corner posts with U bolts for handrail, midrail and L bolts to retain the toeboard across the ends.

In the plastic bag.

- Two 'R' clips to lock the adjustable struts.

INSTRUCTIONS

Your ladder staging brackets should be assembled as shown below. If your ladders are fitted with our ANKALAD Stabilisers and Levellers you will find that the resulting staging is much more user-friendly as the stabilisers completely eliminate ladder bounce. To comply with the requirements of BS 1139 part 5 and HD 1000 you should use our 2" (50mm) diameter hand rails which will span two or three metres.
